Mohammad Iqbal Elham

FULL STACK WEB DEVELOPER

📞+93765181256 | iqbal.elham7@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#) | [Wellfound/Angellist](#)

SUMMARY

Adaptable full-stack web developer with expertise in JavaScript (React.js), Python (Django), and Ruby on Rails. Proven experience in delivering scalable web applications and collaborating with international teams. Strong focus on clean code, remote teamwork, and continuous learning.

SKILLS

Front-End: JavaScript, React.JS, Next.JS, React Native, CSS3 (Bootstrap, Tailwind)
Back-End: PostgreSQL, SQLite, Python (Django), Ruby on Rails
Tools & Methods: Git, GitHub, Restful, Mobile/Responsive Development, Chrome Dev Tools
Professional: Remote Pair-Programming, Teamwork, Mentoring

EXPERIENCE

Freelancing Projects   Remote
Full Stack Web Developer   Dec 2023 – Present

Delivered high-quality web applications for international clients using JavaScript (React.js) and Python (Django). Managed remote collaborations, ensuring timely delivery of scalable solutions.

Hyper Taxi — Developed a platform streamlining transportation services in Iceland, improving booking efficiency for locals and tourists. The system allows users to easily book taxis and tour packages through an intuitive web interface.
- Built with: React.JS, Tailwind CSS, PostgreSQL, PayPal Gateway, Python (Django)
- Find the [Live Demo here](#)

Second Hand Bookstore — This project was mainly created for students to sell the books they have read. Users can create a profile, search for their books, add them to wishlists, and upload them for sale.
- Built with: HTML5, CSS, PostgreSQL, Python (Django)
- Find the [Source code here](#) and [Live Demo here](#)

Pro Futuro Consulting a.s.   Remote
Software Developer   Dec 2023 – Aug 2024

- Developed custom business applications using Zoho Creator and Catalyst.
- Streamlined client processes with optimized Deluge scripts and workflows.
- Integrated React.js frontends with Zoho backends and developed Python APIs.
- Utilized Python to develop APIs, data processing, and backend logic to extend the capabilities of Zoho solutions.

Netlinks Inc.   On-Site
Software Developer   July 2023 – Dec 2023

- Customized Odoo ERP modules using Python to meet specific business needs and improve efficiency.
- Managed PostgreSQL databases, ensuring optimal performance and data integrity.
- Collaborated cross-functionally to design and implement solutions.
- Provided technical support and training while maintaining data security and system reliability.

MICROVERSE   Remote
Mentor (Volunteer)   Dec 2022 – Present

- Mentorship of 4+ junior web developers, providing hands-on guidance and technical expertise via comprehensive code reviews.

EDUCATION

MICROVERSE   Dec 2022– Oct 2023
Remote Full Stack Web Development Program, Full-Time
- Spent 1300+ hours mastering algorithms, data structures, and full-stack development
- Gained expertise in remote pair programming, GitHub workflows, and cross-cultural collaboration through daily standups and industry-standard practices.

Kateb University
Bachelor's Degree, Computer Science   Aug 2018– Jul 2022
- Graduated with honors, specializing in software design and development.
- Core coursework: Data Structures, Algorithms, Web Development, and System Analysis.

Extra-Curricular Activities

ACM International Collegiate Programming Contest (ICPC)   Feb 2022
- Ranked fourth position out of 47 teams.

Google Developers Student Club (GDSC) at Kateb University   2020– 2021
- Core Team member.
- Provided Seminars, Workshops, and mini-courses related to Google's technologies, such as Android Development.

ACM International Collegiate Programming Contest (ICPC)   2019– 2021
- Co-organizer and IT Technical.
- Building network topologies.
